

HIP

HS-DS67

Door Sensor 433 MHz

FEATURES

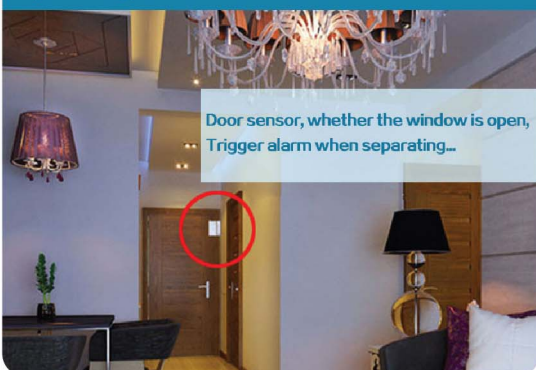

- Syncs with the Alarm Security System for connected home security
- Automatically sends mobile notifications when an alarmed door or window is open
- Connects to work seamlessly with other smart home gadgets
- Adopt CMOS low-power consumption microprocessor.
- Low voltage alert function
- Anti high frequency interference
- Transfer digital wireless signals

TECHNICAL SPECIFICATIONS

Model	HS-DS67
Product Name	Door Sensor 433MHz
Working Voltage	DC 3V (CR2032)
Standby Current	≤ 5mA
Working Current	≤ 1.5mA
Working Temperature	-10°C~50°C
Emission Distance	≥ 50m (open field)
Triggering Distance	25-35mm
Under Voltage Monitoring	2.2 ± 0.2V
Wireless Encode Mode	ev1527
Emission Frequency	433MHz
